

AGATCAAGAAGG

The image displays a DNA double helix structure. The top strand is composed of the following nucleotides: Adenine (green), Guanine (orange), Adenine (green), Thymine (red), Cytosine (blue), Adenine (green), Adenine (green), Guanine (orange), and Guanine (orange). The bottom strand is composed of the following nucleotides: Guanine (orange), Cytosine (blue), Adenine (red), Thymine (green), Thymine (green), Guanine (orange), Guanine (blue), Adenine (green), and Adenine (green). The base pairs are: A-G, G-A, A-T, T-C, C-A, A-A, A-A, G-G, G-G.
