

G G G A T T A A

The image displays a DNA sequence GGGATTAAG. The first three nucleotides (GGG) are colored orange, the next three (TTA) are green, and the final one (A) is orange. A red horizontal line is positioned below the first 'G' of the GGG segment. A yellow 'G' is located directly beneath the first 'T' of the TTA segment, indicating a G-to-T transition mutation at that position.
