

TGAATTAGC

The image displays a DNA double helix structure. The top strand is composed of the bases T, G, A, A, T, T, A, G, C. The bottom strand is composed of the bases A, C, A, T, T, C, G. The bases are color-coded: T is red, G is orange, A is green, and C is blue. The structure shows the major and minor grooves of the DNA molecule.
