

G C G G C G T C A G

A DNA sequence logo for the sequence GCGGCGTCAG. The top row shows the sequence in large, bold letters: G (yellow), C (blue), G (yellow), G (yellow), C (blue), G (yellow), T (red), C (blue), A (green), G (yellow). Below this, a second row shows the probability of each nucleotide at each position, represented by smaller letters of the same color. The letters are stacked vertically, with the top letter being the most frequent. For example, at position 1, G is the most frequent, followed by C, then A and T. At position 7, T is the most frequent, followed by G, then C and A. The letters are connected by horizontal lines of the same color, creating a continuous structure. The background is white.
