

TCCACCATGAG

The image shows a DNA double helix segment. The top strand is composed of the following bases: T (red), C (blue), C (blue), A (green), C (blue), A (green), T (red), G (orange), A (green), G (orange). The bottom strand is composed of the following bases: A (orange), G (green), G (orange), T (red), G (orange), C (green), C (blue), A (red), C (blue). The bases are connected by horizontal bars representing base pairs. The colors of the bases are: T (red), C (blue), A (green), G (orange). The colors of the bars are: T-A (red), C-G (blue), C-G (blue), A-T (green), C-G (blue), A-T (green), T-A (red), G-C (orange), A-T (green), G-C (orange).
