

GGGCAGTTAG

The image displays a DNA double helix structure. The top strand is yellow and contains the sequence 'GGGCAGTTAG'. The bottom strand is green and contains the sequence 'CCGACCTAG'. The two strands are connected by hydrogen bonds, represented by red lines. The first two base pairs (G-C and G-C) are connected by two hydrogen bonds each, while the remaining three (T-A, T-A, and A-G) are connected by three hydrogen bonds each.
