

GGTGAACGTC A

The image displays a DNA double helix structure. The top strand is composed of the following nucleotides: G (orange), G (orange), T (red), G (orange), A (green), C (blue), G (orange), T (red), C (blue), and A (green). The bottom strand is composed of the following nucleotides: C (green), A (blue), A (red), T (orange), G (green), C (blue), G (orange), A (green), and T (blue). The strands are connected by horizontal bars representing base pairs. The sequence of the top strand is GGTGAACGTC A.
